IDENTIFIERS *Hawaii

ABSTRACT

Data are presented on a series of tables summarizing enrollment trends and the personal characteristics of the 21,391 regular students enrolled in credit programs at the Hawaii community colleges during spring 1982. The tables cover: (1) headcount enrollment in regular credit and special programs; (2) headcount and full-time equivalent enrollment by campus for the years 1975-76 through 1982-83; (3) selected student characteristics (i.e., sex, educational objectives, major, attendance status, semester hours taken, residence, tuition status, age, citizenship, and registration status); (4) student profiles in terms of these characteristics for fall 1980 through spring 1983; and (5) distribution of majors by campus. The data provided indicate, among other findings, that the regularly enrolled students constituted 80% of the total spring 1982 enrollment. The average student semester hours taken decreased from 9.5 in spring 1982 to 9.3 in spring 1983, which may be attributed to the increasing proportion of part-time students. Average semester hours taken by full-time students had held steady at 13.8 for seven semesters. Demographic data reveal that the median age of the students was 22.6 years, 50.5% of the students were male, and 76.7% were pursuing an associate degree. General and pre-professional majors comprised 39% of the enrollment, while vocational education majors made up another 46%. (DAB)

SPRING ENROLLMENT REPORT
UNIVERSITY OF HAWAII, COMMUNITY COLLEGES
SPRING 1983

This report summarizes data on students enrolled at Honolulu, Kapiolani, Kauai, Leeward, Maui and Windward Community Colleges, which are organized under the Office of the Chancellor for Community Colleges.* The primary emphasis of the report is on students enrolled as classified or unclassified students in credit programs. A registration count of students enrolled in other programs (primarily non-credit programs) as well as the registration counts of students in programs sponsored by the Employment Training Office and by Ho'omana are included.

Sources of Data

Except for Table 1, the data cited in this report are extracted from the Student Enrollment Reports (SER) as of March 10, 1983. The basic data are derived from student applications, personal history forms and student class registrations.

Highlights

A. Registrations in various community college offerings number 26,824 this spring (Table 1). Of these:

   1. 21,391 (80%), are regular students enrolled in credit programs.

   2. 143 (1%), are early admits, concurrent registrants, or other special students enrolled in credit programs.

   3. 1,137 (4%), are apprentices or journeyworkers.

   4. 4,153 (15%), are registrants in special programs such as the Kaneche Community and Senior Center and public/community service programs at various campuses, etc.

B. Data on 21,391 regular (classified and unclassified) students (Tables 2, 3, 4, and 5) in credit programs show the following:

   1. This spring's enrollment of 21,391 is the highest spring enrollment recorded for the community colleges, second only to this past fall's enrollment.

---

*This report excludes data for Hawaii Community College, which is an organizational component of the University of Hawaii at Hilo.

...Enrollment data for this spring show an increase of 1,105 students, 5 percent over last spring, but 785 (4%) fewer students than this past fall. This is a relatively small fall-to-spring enrollment decline, especially in light of this past fall's record enrollment.

...Enrollment increased over last spring at all campuses.

2. Several trends are continuing:

...There are proportionately more part-time students than in previous spring semesters: 56 percent this spring compared with 54 percent and 52 percent for the Spring 1982 and 1981 semesters.

...Students are taking fewer credits. The average student semester hours (SSH) taken is 9.3 compared with 9.4 last semester and 9.5 last spring. This is due to the increasing proportion of part-time students. Average semester hours taken by full-time students has held steady at 13.8 for seven semesters.

3. There are minimal changes in the following:

...96 to 97 percent of the students have Hawaii permanent home addresses.

...the distribution of students from Oahu campuses with local address in the Honolulu, Leeward, and Windward areas has remained relatively stable over the past three years.

Summary

The Spring 1983 enrollment figures show a 5 percent increase over figures reported for Spring 1982. This is the highest spring enrollment recorded, and is only 4 percent lower than last fall's enrollment, which was the highest recorded for the community colleges.

The community colleges continue to serve more part-time students taking fewer credits and are beginning to serve proportionately more unclassified students.

TABLE 1
